DETAILED ACTION

Allowable Subject Matter

Claims 1-6, 8-9, 12, and 14-22 are allowed.

The following is an examiner's statement of reasons for allowance:

Claim 1 recites that the safety stock is directly calculated from specific parameter values. One of the values is "a value of a cost of obtaining the product from one or more spot market sources". A spot market is a market where products can be obtained with zero lead-time. The prior art, such as Brinkley, considers if products can be obtained in a spot-market, but falls way short of showing that an actual value of the cost of obtaining the product in this manner is directly used in a calculation of safety stock.

Claim 9 recites a step of computing iteratively reducing the second amount of the product from an initial amount ... Brinkley does not show or teach this feature in combination with the determining and reducing steps as specifically claimed.

Claims 2-6, 8, 12, and 14-21 are dependent upon claims 1 and 9.

The Takriti foreign reference shows a system of interest.

The Choudhury et al. NPL reference shows a system of interest.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
